AROMA NECTAR

I. Good Quality in wet ripening seasons.

II. Edible to rind in dry years.

A. Elastic rind, permitting determining stage of ripeness.

B. Practically immune to bacterial wilt.

C. Of large size to ten (10) pounds.

Also known as ALL-WEATHER, AROMA NECTAR is oval shape, medium ribbed, medium netting, thick and salmon colored flesh. Outside color grey turning to yellow to gold. Carrying qualities 4 to 6 days from full slip. Flavor excellent.

Point for point, after tests with leading American, European and Oriental varieties and more than 25 originations, we believe this is the finest humid region melon, excepting Ingoldsby, in existence.

Origin 1937. Cross of In-gold and Bender's Surprise.

Composition— $\frac{3}{4}$ Bender's Surprise, $\frac{1}{4}$ Golden Marvel.

Pedigree stock from a parent melon containing less than 300 seeds.

By Mail—Charges paid: Ounce, \$1.00; $\frac{1}{4}$ pound \$3.00.

INGOLDSBY

Of the same general type as Aroma Nectar, but with a sweeter and better flavor and more resistant to wet ripening seasons.

Origin 1937. Cross of Bender's Surprise and C F I.

Composition— $\frac{3}{4}$ Bender's Surprise, $\frac{1}{4}$ Weaver's Special.

3 cents each. \$2.50 per 100.
